STAINLESS STEEL SAW

WELCOME TO THE PREMIUM BRAND IN RAILING SYSTEMS

We will not rest until we have achieved the perfection you expect.

PREMIUM IN EVERY WAY

Nothing but the best

- Highest quality
- High-grade materials
- Flawless surface finishes
- Highly accurate dimensions and minimal tolerances

Unbelievably quick

- Extensive worldwide stock at branch and at Head Office
- Rapid delivery
- Detailed and personal technical advice
- 24/7 online ordering

Options for every situation

- Huge range of products
- Countless different design styles
- Everything you need to create a complete railing or handrail
- Mix and match to achieve a custom design

100% safe

- Thorough internal testing procedures
- Extensive testing carried out by certified independent testing institutions and leading authorities
- Testing procedures and official approvals that comply with the main international building codes and standards

Beauty and brains

- Many innovations and product improvements every year
- Visual designs to suit every taste
- Features that make for quick and easy mounting

Online resources : www-q-railing.com

- Assembly videos, BIM objects, CAD drawings and other technical specifications
- Q-PAC (Professional Anchor Calculation) software that lets you easily identify the correct Q-railing anchor
- Catalogues, brochures, reference projects and more

OUR MATERIALS

Stainless steel

Strong and beautiful to look at, stainless steel is one of the most popular materials for railing systems. It comes in various grades, each with a slightly different composition. On its own, steel would naturally corrode, but different elements can be added to make it stainless. The industry standard for interior use is a 304-grade stainless steel. 316-grade stainless steel contains 2% molybdenum, which makes the material more resistant to cracking, pitting and harm caused by tension. We normally recommend 316-grade stainless steel for outdoor use.

Aluminium

Lightweight yet strong, aluminium has a naturally-occurring oxide layer that helps provide corrosion resistance. (mill finished aluminium). For greater protection, the layer can be anodised. Most of our aluminium products in this catalogue have a 25µ thick anodisation layer. This is the best protection for outdoor use.

E-coated and powder-coated steel

Steel is a highly robust, yet cost-effective material. Q-railing's steel products have an e-coating that provides a corrosion-resistant and scratch-resistant finish. It also prepares the surface for lacquering or powder coating.

Zamak

Robust and inexpensive, die-cast zamak can be a highly economical alternative to other metals. However, we recommend it for indoor uses only. To give the material an attractive finish, you can add a varnish or coating. In fact, some of Q-railing's zamak products have a stainless steel effect finish, for your convenience.

Cleaning and maintenance

Stainless steel is a highly resistant metal that is less susceptible to corrosion and scratching than other metals. It however requires an ongoing maintenance regime. The intervals are determined depending on the environment it is used in. After installing any of our stainless steel products, we recommend that you treat the entire structure with Q-ultra-clean to remove any detergents and/or contaminants that prevent oxygen from reaching the naturally reoccurring passive layer.

Other materials used in our products – steel, aluminium and zamak – can be cleaned with warm soapy water.

STAINLESS STEEL CLEANERS AND PROTECTORS		
Q-ultra-clean Removes aggressive (ferritic) contamination and surface corrosion; regenerates and reinforces the protective passive layer.	Q-cleaner Cleans and enhances shine.	Scotch®-Brite Removes scratches.

Application of materials

Environmental influences	Applications	Zamak	Aluminium	E-coated and powder-coated steel	Stainless steel 304	Stainless steel 316
		Low Indoor structures But not in wet locations.	✓	✓	✓	✓
Moderate Indoor structures But not in locations that have a noticeable chlorine or sulphur-dioxide load (e.g. chemical factories).	✓	✓	✓	✓	✓	
Medium Outdoor structures In areas with a moderate chlorine or sulphur-dioxide load (e.g. at least 25 km from the coast and other aquatic environments).	✗	✓	✓	✗	✓	
High Outdoor structures In areas where there is likely to be a strong corrosive effect due to chlorine, sulphur-dioxide load, high humidity or accumulation of harmful substances (e.g. coastal regions and swimming-pool environments).	✗	✓	!	✗	✓

EASY GLASS[®] UP

THE GLASS RAILING FOR
PARAPET WALLS

Clear views from any area enclosed by parapet walls

The Easy Glass® Up base shoe is ultra-slender at only 80 mm high.

- Light and medium use railings for indoor and outdoor parapet walls
- Compatible with glass infills up to 700 mm high
- Convenient installation from inside the railing
- Quick and easy glass mounting with the unique Safety Wedge System (wedges and rubber set)
- Can be combined with:
 - Q-railing's glass mounted handrails, cap rails, U-profiles and edge protection
 - Q-glass (glass infill – custom made or from stock)
 - Q-lights Linear Light (for LED-lit handrails and cap rails)

Easy Glass® Up is designed for mounting on parapet walls.

EASY GLASS[®] SLIM

THE ALL-TIME CLASSIC

High transparency, highly acclaimed

Easy Glass® Slim is a classic within our glass railing range. Whether your project setting is a home, an office or a public area, this glass railing system is a cost-effective solution. Its minimalist design includes a slender base shoe that makes for an elegant appearance and helps to reduce the weight of the railing.

- Light and medium use railings for indoor and outdoor settings, including stairs
- Quick and easy glass mounting with the Safety Wedge System (wedges and rubber set)
- Can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - All Q-railing's glass mounted handrails, cap rails, U-profiles and edge protection
 - Q-lights Linear Light (for LED-lit handrails and cap rails)

The minimalist base shoe is just 45 mm wide, which makes it light and easy to manoeuvre

EASY GLASS[®] SMART

SET A SPEED RECORD

Incorporates the Q-disc System. Turn to page 40 to find out all about this groundbreaking new approach to securing glass infills.

Unbeatable ease of installation

Easy Glass® Smart is a glass railing revolution. Complicated anchoring systems are a thing of the past. With a host of innovative features, including the Q-disc® System for glass mounting, Easy Glass® Smart lets you carry out installation or removal in a quick, intuitive and controlled fashion. In fact, those jobs can be finished faster than with any other quality glass railing. And it's just one way this highly economical system will save you money.

- Symmetrical top-mount base shoe
- Light and medium use railings for indoor and outdoor settings
- Minimal use of anchors in base shoe installation
- A choice of fixing methods: hexagon bolts, mechanical anchors or stud anchors
- Easy to work on with the tools supplied
- Optional aluminium shoe shims available for levelling uneven surfaces

Easy Glass® Smart	UK	DE	NL	IT	CH	ES	FR
Max. line load (kN/m)	0,74	1,0	1,0	2,0	1,6	3,0	1,0

Please refer to the respective certificates for specifications such as mounting details and glass dimensions. For more information, please visit our website: www.q-railing.com/certificates

EASY GLASS® SMART VARIANTS

Smart Top mount

- Also for in-floor mounting (protective layer needs to be applied)

Smart Fascia mount

- Optional base shoe cladding

- Also allows inverse mounting
- For parapet walls
- Optional base shoe cladding

Q-DISC® SYSTEM

THE INNOVATION THAT TURNS THE WORLD UPSIDE DOWN

Installing a glass railing will never be the same again. The revolutionary Q-disc® System speeds up the glass mounting process by radically simplifying it. Easy Glass® Smart is the first glass railing ever to include the Q-disc System.

How it works:

1

Put the inlay into the Easy Glass Smart base shoe

2

Position the glass panel

3

Insert the Q-disc

4

Connect the tool to the Q-disc and push it sideways to secure the infill

EASY GLASS[®] PRO

GLASS ALIGNMENT
MADE EASY

Convenient installation and glass alignment

Install from inside the railing

Installing the Easy Glass® Pro base shoe is easy. In addition, the unique Safety Wedge System of rubbers and adjustable wedges makes for hassle-free glass alignment, as it lets you adjust each glass panel independently by up to 10 mm from the vertical. And with five base shoe variants, you can be certain of finding a Pro solution that suits your construction requirements.

- Light and medium use railings for indoor and outdoor settings, including stairs
- Uses cost-effective hexagon-head anchors instead of countersunk anchors
- Can be combined with:
 - Q-glass (glass infill - custom made panels or from stock)
 - Q-railing's glass mounted handrails, cap rails, U-profiles and edge protection
 - Q-lights Linear Light (for LED-lit base shoe cladding, handrails and cap rails)

Easy Glass® Pro	UK	DE	NL	IT	CH	ES	FR
Max. line load (kN/m)	1,5	1,0	1,0	>2,0	1,6	1,6	1,0

Please refer to the respective certificates for specifications such as mounting details and glass dimensions. For more information, please visit our website: www.q-railing.com/certificates

EASY GLASS® PRO VARIANTS

Pro Top mount

- Also for in-floor mounting
- Stainless steel look available
- Optional LED-lit base shoe cladding

Pro F Top mount

- For unfinished floor
- Can be installed at or beyond the edge of a surface

Pro Fascia mount

- Can be installed at or beyond the edge of a surface
- Optional base shoe cladding

Pro Y Fascia mount

- For floors with no finish
- Can be installed at or beyond the edge of a surface
- Optional base shoe cladding

Pro Inverse Fascia mount

- For parapet walls
- Optional base shoe cladding

Railing bases

EASY GLASS® PRO - Base shoe, top mount

EASY GLASS® MAX

THE STRONGEST GLASS
RAILING EVER

The robust yet lightweight aluminium base shoe is easy to handle

Exceptionally strong and safe

This elegant strongman can cope with extremely heavy line and wind loads. Its combination of qualities makes Max the perfect choice for high demand public areas such as stadiums, airports and shopping malls.

- Heavy and extremely heavy use railings for indoor and outdoor settings, including stairs
- Simple installation with hexagon-head anchors
- Can be installed directly on to concrete or steel structures
- Quick and easy glass mounting thanks to the Safety Wedge System (wedges and rubber set)
- Can be combined with:
 - Q-railing's glass mounted handrails, cap rails, U-profiles and edge protection
 - Q-glass (glass infill – custom made panels or from stock)
 - Q-lights Linear Light (for LED-lit handrails and cap rails)

Easy Glass® Max	UK	DE	NL	IT	CH	ES	FR
Max. line load (kN/m)	3,0	3,0	3,0	>4,5	3,0	3,0	3,0

Please refer to the respective certificates for specifications such as mounting details and glass dimensions. For more information, please visit our website: www.q-railing.com/certificates

EASY GLASS[®] HYBRID

THE CLEAR ANSWER
TO BALCONIES

A railing with or without balusters – your choice

This versatile system is ideal for settings such as non-projecting balconies. When installed between two walls, it can provide an all-glass railing up to 3,2 metres wide, without posts. For longer spans, or in situations where there are no supporting walls, simply add some of the slender baluster posts. With a base shoe just 43 mm high, the Hybrid system creates elegant but robust structures.

- Light and medium use railings for indoor and outdoor settings
- No anchors required – plugs and screws only
- Steel posts powder coated in RAL 7047 or e-coated, ready for powder coating
- Can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - Q-lights Linear Light (for LED-lit cap rails)

Easy Glass® Hybrid	UK	DE	NL	IT	CH	ES	FR
Max. line load (kN/m)	0,74	0,5	0,5	3,0	0,8	3,0	1,0

Please refer to the respective certificates for specifications such as mounting details and glass dimensions. For more information, please visit our website: www.q-railing.com/certificates

Q-INFO MOD 6505

An e-coating, also called electrophoretic primer, is a thin layer of 15 µ which provides a protection layer (primer coat) to steel products. After e-coating, a product is prepared for the final surface treatment, which can be lacquering or powder coating.

Q-INFO

An e-coating, also called electrophoretic primer, is a thin layer of 15 µ which provides a protection layer (primer coat) to steel products. After e-coating, a product is prepared for the final surface treatment, which can be lacquering or powder coating.

EASY GLASS®

JULIET BALCONIES

SAFETY AT
FLOOR-TO-CEILING
WINDOWS

Easy Glass®
MOD 6507/6508

Easy Glass® View

Elegant, minimalist structures that deliver maximum strength

An Easy Glass® MOD 6507/6508 Juliet balcony provides a light but ultra-safe barrier. It is attached to the facade by its stainless steel cap rail, using wall flanges. By contrast, an Easy Glass® View Juliet balcony has aluminium profiles that let you mount it in three different ways: onto a facade, between reveals or onto a window frame.

- Light and medium use Juliet balconies
- MOD 6507/6508 can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - Q-lights Linear Light (for LED-lit handrails and cap rails)
- View can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - All Q-railing's U-profiles and edge protection

Easy Glass® 6507 / 6508	UK	DE	NL			
Max. line load (kN/m)	1,5	1,0	1,0			
Easy Glass® View	UK	DE	NL	IT	CH	ES

EASY GLASS®
WALL

A GLASS WALL
AND RAILING IN ONE

Open up your staircase

Why would you create a light and airy staircase then close it in with an opaque wall? Use Easy Glass® Wall and make your design an eye-catching feature. The system provides an all-glass, floor-to-ceiling partition that also fulfils the role of a balustrade. In addition to showing off your staircase design, the glass will allow natural light to flood in.

- Light and medium use ceiling-high partitions for indoor and outdoor settings
- Easy mounting confirmed by a reassuring click
- For glass up to 3.5 m high and a variety of span widths
- Compatible with Q-railing's glass mounted handrails and brackets

This glass partition is held by elegant aluminium profiles at floor and ceiling

Q-INFO

Calculation

$$H \text{ (m)} \times B \text{ (m)} \times 2,5 \times T_g \text{ (mm)} = \text{kg}$$

Example

H	B	T
1,1 m	1,0 m	16 mm
1,1 x 1,0 x 2,5 x 16 = 44,00 kg		

* VSG (2x ESG): Laminated glass from toughened glass

Q-INFO

LIGHT UP YOUR
GLASS RAILING

Q-lights Linear Light for cap rails

194

Q-lights Linear Light for base shoes

196

Create atmosphere and a safer environment by adding a stream of ambient light to your railing.

Add well-designed illumination to a railing and you not only change the ambience of your space but also make it safer for users. Q-lights is an effective and cost-efficient concealed-light solution for railings. It is easy to install and easy to use.

- Linear LED lighting for cap rails, handrails and base shoes
- LED strips that provide warm/cold white light (24 V – IP20 for indoor use and IP66 for outdoor use)
- Can be combined with a dimmer
- Pre-wired – no cables visible
- Vandal-proof (IK10)
- Compatible with most Q-railing systems

Q-lights Linear Light for handrails

198

Q-LIGHTS VARIANTS

Linear Light

Linear Light for cap rails

- Position the LED strips in front of or behind the glass
- Transparent or frosted plastic covers
- Special adapters for mounting LED cap rails on handrail brackets

Linear Light for handrails

- Handrail brackets with cable duct
- Transparent or frosted plastic covers

Linear Light for base shoes

- Illuminated cladding for Easy Glass® Pro top mount
- Stainless steel effect

Q-INFO MOD 0062 / 0063

Q-INFO

LED STRIP INFORMATION

- All strips are prewired once. For additional connections, use a connection cable (page 191).
- Each strip can be cut with scissors, between the copper dots, to the required length.
- Cut LED strips can be connected using a connector (page 193).
- All models are suitable for connectors on Linear Light cap rails and Linear Light handrails (page 194-202).
- When connecting strips, the max. length from the start to end of the LED strip should not exceed its own original strip length!

Q-INFO

SAFETY INFORMATION

- Installation of the mains modules has to be carried out by a qualified electrician according to the applicable local regulations and standards.
- Observe correct electrical polarity. Incorrect polarity can destroy the modules.
- Only parallel drive circuits ensure a safe operation.
- Power supply units used for operation should include the following basic protection and safety features:
 - Short-Circuit Protection
 - Overload Protection
 - Overheat Protection
 - SELV (Safety Extra Low Voltage)
- Pay attention to the maximum output of the power supply.

MAKE A VISUAL STATEMENT

Create just the look you want. We have baluster railings in a wide variety of styles, utilising both round and square forms. You also have components for a choice of five different infills: cable, bar, web, plate and glass.

Want an even more individual look? Simply combine items from different product lines.

RAILING SECTIONS

Our baluster railing systems usually consist of three sections (A–B–C), each of which is divided into various product groups. The following pages will walk you through your options. ▶

- A** Baluster posts
- B** Handrails
- C** Infills

DUO LINE

A STUNNING
INDUSTRIAL LOOK

A striking design with clean lines

With its stylish combination of stainless steel and RAL 7016 anthracite grey finishes, Duo Line is the perfect system for creating an industrial look and feel. But it doesn't just look great, it also delivers on functionality. Mounting the system couldn't be easier: just push and clamp the infill adapters onto the aluminium posts, screw the powder coated zamak infill holders into place and position the infill.

- Top and fascia mounted variants
- Light and medium use railings for indoor and outdoor settings, including stairs
- Highly scratch-resistant powder coating
- MOD 42 glass clamp with identical powder coating available
- Infills adjustable even after mounting
- Can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - Q-railing handrails – round or square, stainless steel or wood (Naturail and Bendywood)
 - Q-lights Linear Light and Q-lights Spotlight (for LED-lit handrails)

You will find the calculation basis for tubes, bars and cap rails at www.q-railing.com/test-calculation

SQUARE LINE® 40x40

CRISP LINES AND
GEOMETRIC FORMS

For a pared-down, contemporary look

Square Line® 40x40 proves that great design doesn't have to be complicated. Its simple lines and stainless finish bring a smart, geometric look to railings and stair-rails. But it is no problem if you prefer round forms. Square Line is highly modular, so you can combine it with parts from other Q-railing baluster railing systems.

- Top and fascia mount variants
- Light and medium use railings for indoor and outdoor settings, including stairs
- No welding required - only gluing, drilling and tapping
- Can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - Q-railing handrails – round or square, stainless steel or wood (Naturail and Bendywood)
 - Q-lights Linear Light and Q-lights Spotlight (for LED-lit handrails)

SQUARE LINE® 60x30

POWERFUL FORMS

A simple design that delivers on strength

Square Line® 60x30 has an uncompromising look – ideal for when you want to make a bold statement. The system's stainless balusters and handrail assert themselves with simple geometric forms and are suitable for settings with a high-safety demand.

- Top and fascia mounted variants
- Light and medium use railings for indoor and outdoor settings, including stairs
- No welding required - only gluing, drilling and tapping
- Can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - Q-railing handrails – round or square, stainless steel or wood (Naturail and Bendywood)
 - Q-lights Linear Light and Q-lights Spotlight (for LED-lit handrails)

Square Line 60x30	UK	DE	NL	IT	CH	ES	FR
Max. line load (kN/m)	3,0	1,0	0,8	2,0	3,0	3,0	1,0

Please refer to the respective certificates for specifications such as mounting details and glass dimensions. For more information, please visit our website: www.q-railing.com/certificates

Q-LINE

SOFT FORMS
AND FLEXIBILITY

A system that provides endless options

Q-line is, without doubt, our most versatile system. It comes with a mass of different components that can deal with most architectural challenges, and just about any special requirement. You can even create a railing with a totally mirror polished finish. Or how about bringing in some parts from other systems to create a totally unique design? Just let your imagination loose.

- Top and fascia mount variants
- Light and medium use railings for indoor and outdoor settings, including stairs
- No welding required - only gluing, drilling and tapping
- Can be combined with:
 - Q-glass (glass infill – custom made panels or from stock)
 - All Q-railing handrails – round or square, stainless steel or wood (Naturail and Bendywood)
 - Q-lights Linear Light and Q-lights Spotlight (for LED-lit handrails)

**Q-LIGHTS**

318 - 323

**MOD 8925, 0900**

311, 313

You will find the calculation basis for tubes, bars and cap rails at www.q-railing.com/test-calculation

Q-INFO**Save time and money with Q-tube**

Q-tube has a far tighter tolerance than a standard commercial tube. Even the welding seam of Q-tube has been specially adapted to our fittings. Therefore the tube fits perfectly in conjunction with our fittings, in order for you to be able to work fast and effectively. To prevent damage, and to guarantee the quality, each tube section is separately packaged.

Q-LIGHTS

LIGHT UP YOUR
BALUSTER RAILING

Q-lights Linear Light for handrails

321

Transform a railing or staircase and turn it into a safety feature.

Light is one of the most effective ways to engage people's emotions. It can totally change the way you feel about a place. Q-lights Linear Light and Q-lights Spotlight put an exciting palette of light effects at your disposal. Add them into your chosen Q-railing system and play to your heart's content using the remote control.

- Linear Light is for a continuous LED stream, whereas Spotlight has LEDs at intervals
- Simply click the strips or spots into place
- Pre-wired – no cables visible
- Vandal-resistant (IK10)
- Compatible with most Q-railing systems

Q-lights Spotlight for handrails

318

Q-LIGHTS VARIANTS

Linear Light

- For handrails (special adapters for mounting LED cap rails on handrail brackets)
- Warm/cold white light (24 V – IP20 for indoor use and IP66 for outdoor use)
- Transparent or frosted plastic covers
- Position the handrail LED strips in front of or behind the infill

Spotlight

- For round tubes (Ø 42,4 or 48,3 mm)
- Handrail brackets, handrail adapters and wall flanges with cable duct
- 12 V (IP20 for indoor use and IP66 for outdoor use)

For tube 42,4 x 2,0 mm

Asymmetric light beam
Colour temp 5000K
0,5W, 12V, 40mA, 22lm

Q-INFO

We recommend to mill the hole, if that is not possible a step drill should be used. Always deburr drill holes and remove drilling remains to avoid cable breakage. Don't start installation of LED Spotlights until all holes have been deburred internally and externally.

MOD 0051 and 0052 are available in multiple colours.
Please contact your sales office for the possibilities.

Q-INFO

MOD 0051 / 0052

▶ Assembly video: www.q-railing.com/videos

Q-INFO MOD 0051 / 0052

Safety information
320

Q-INFO

We recommend 600 mm distance between LED spotlights to get the best luminous efficacy.

Luminous efficacy on floor/staircase of a 900 mm high handrail

		Distance (A) between LED spotlights (mm)							
		400		600		1000		1200	
		IP20	IP66	IP20	IP66	IP20	IP66	IP20	IP66
Distance from wall (mm)	0	16 lx	18 lx	14 lx	17 lx	8 lx	14 lx	7 lx	13 lx
	600	12 lx	15 lx	12 lx	15 lx	9 lx	12 lx	6 lx	10 lx
	1000	7 lx	8 lx	5 lx	7 lx	5 lx	6 lx	3 lx	5 lx
	1500	2 lx	3 lx	2 lx	3 lx	2 lx	2 lx	1 lx	1 lx

Lux (lx) explanation

- direct sunlight = 100.000 lx
- overcast day, typical tv studio lighting = 1.000 lx
- hall lighting = 100 lx
- street lighting = 10 lx
- candle, approx. 1 m distant = 1 lx

Any lighting calculations shown should be taken as a guide only, as all site conditions/lighting codes are different. It is strongly recommended that you consult with a lighting consultant or electrical engineer to determine the exact requirements for your project.

Q-INFO

SAFETY INFORMATION

- Installation of the mains modules has to be carried out by a qualified electrician according to the applicable local regulations and standards.
- Observe correct electrical polarity. Incorrect polarity can destroy the modules.
- Only parallel drive circuits ensure a safe operation.
- Power supply units used for operation should include the following basic protection and safety features:
 - Short-Circuit Protection
 - Overload Protection
 - Overheat Protection
 - SELV (Safety Extra Low Voltage)
- Pay attention to the maximum output of the power supply.
- Don't start installation of LED Spotlights until all holes have been deburred internally and externally.

CRYSTAL CLEAR, ABSOLUTELY SAFE

Although you may think of glass as a fragile material, it is actually extremely strong. This makes it an excellent choice for a railing infill. And when you combine it with Q-railing's highly robust glass-infill holders, you have a practically indestructible railing. We know because we have tried! At our in-house testing facility, we continually subject our products to rigorous tests. In addition, extensive testing is carried out by certified independent testing institutions and leading authorities.

As a result, you can expect our glass clamps – tested in accordance with the EN-12600 international standards – to resist dynamic loads of up to 50 kg. This is true, whether you choose to combine them with toughened, laminated glass or monolithic glass (6 - 21.52 mm). Both options comply with international DIN- and BS-standards, and are AbZ approved.

On the pages that follow, you will find test results that provide guidelines for determining which glass clamps should be combined with which glass panels to achieve optimum approved results. ▶

CERTIFICATION

Our glass clamps have been tested according to the DIN/EN 12600 testing method, resulting in the German AbZ approval. The approved results are presented on the following pages.

AbZ - EN-12600

SAFETY

Fascia mount? Safety first!

Use security pins or security plates.

D LINE

d line
HANDRAIL SYSTEM

Danish design by *Knud Holscher.*

"The attitude of expressive and minimalist design in stainless steel is carried through completely in the d line handrail system. It is a product group that is beautiful and functional in use and also easy to install, modify or repair. The d line handrail system can be adapted to the most challenging architecture without compromising the aesthetics."

Fluid design: A natural fit.

A new breed

At its core, d line means flexibility. Like creative building blocks, the entire system is composed of modular parts, for full creative freedom. Whether directional changes or challenging stairwells, individual modules allow you to adapt to any space without aesthetic compromise.

A seamless finish is easy when you work with our system. It's simple to install and the design theme is consistent, so regardless of which parts are used together, you'll still achieve a continuous design.

With extra attention to quality design, d line creates a sleek, glazed effect. Light and space take centre stage, thanks to minimum interruption to the visual field.

Blueprint for quality

A superb balance of glass and 316 stainless steel, d line is not only elegant, but also highly durable. You can confidently specify d line for safety: withstanding impacts of up to 3 kN/m, the entire range complies with various standards such as British Standard.

Intuitive engineering

With our pre-engineered mounting technique, your installation time is shorter and more simple. d line installation can be kept until the final stages of your project to keep parts better protected and workflow unhindered. Easily assembled, disassembled or redesigned, d line can be adapted. For its timeless design and flexible installation, you have found a railing system that's future proof.

Q-INFO MOD 0723 / 0724

Incorrect handling of stainless steel can lead to the formation of extraneous rust. This often results in visible damage, functional limitations and further corrosion leading to extra costs, customer complaints and even major safety risks. By using special stainless steel tools, the development of extraneous rust can be prevented. These stainless steel tools have been hardened to the same level as conventional tools.

Stainless steel should be cut with an appropriate saw for efficient work and ideal results. To guarantee this, stainless steel saws have an ultra-strong but slowly rotating motor. The saw's minimal weight makes it the professional 'must have' tool on site.

SERVICE INFORMATION

Prefix	478
Order form	479
Symbol index	480

PREFIX MAKES LIFE EASIER

Preparation is the key to success. So, why not make use of our time-saving and cost-saving prefix service when you purchase your next railing solution from Q-railing? You will receive everything 100% ready for installation.

To place an order for prefix services, simply download and fill out the request form: www.q-railing.com/prefix

Bending

We can carry out 2D or 3D bending to order on tubular components, cap rails, U-profiles, edge protection top rails and even Easy Glass® base shoes. This meticulous service will ensure that you get exactly the sizes and deflections you need.

Cutting and milling

For maximum convenience, ask us to pre-cut stainless steel, aluminium or wooden products. Handrails, cap rails, balusters and Easy Glass® base shoes are all covered. Your purchases could arrive with mitre cuts already done, or with holes pre-milled to accommodate LED spotlights, for example.

Drilling and tapping

Try our drilling and tapping service just once, and you will insist on using it every time you purchase balusters or handrails from Q-railing. Working to your exact specifications, we will create all the holes and threads you require for installation.

Welding

On very rare occasions, Q-railing's standard products require welding in order to fit a particular situation. But that doesn't have to be a problem. Let us pre-weld your custom-made products and deliver them to you ready for installation.

Pre-assembly

To receive Q-railing products pre-assembled in accordance with your needs, simply order our prefix service. Imagine how much time it would save if, for example, your glass clamps or crossbar holders were pre-installed before delivery.
